DAWAI TRACK

Smart Medicine Platform with Expired Medicine Take-Back System

OVERVIEW

- DawaiTrack is a healthcare platform that combines **online pharmacy services, medicine lifecycle management, and an expired medicine take-back system**.
- The platform enables users to purchase medicines, track orders, and safely return expired medicines. Pharmacies collect expired medicines using QR verification, and administrators ensure proper biomedical disposal.
- This system promotes **safe medicine usage, environmental sustainability, and responsible healthcare practices**.

🎯 PROJECT MOTIVATION

Expired medicines stored at home can cause:

- Accidental consumption
- Environmental contamination
- Unsafe disposal practices

Most pharmacy platforms only focus on **medicine delivery**. They lack structured mechanisms for **tracking expired medicines and disposing them safely**.
